

Mitsubishi Electric's Summit Series UPS Reaches Highest Energy Star Listing

WARRENDALE, Penn. – December 11, 2017 – [Mitsubishi Electric](#), an industry leader in design, manufacturing, and servicing reliable, environmentally friendly uninterruptible power supplies (UPS), announces that the 750kVA SUMMIT Series® UPS product was recently certified by **ENERGY STAR**® to meet 99 percent efficiency in the double conversion operating mode. **ENERGY STAR**® independently certified it to save energy without sacrificing features or functionality.

The SUMMIT Series® UPS is the first UPS to apply Silicon Carbide (SiC) technology, demonstrating Mitsubishi Electric's leadership in mission-critical power electronics. Advanced SiC components increase efficiency by 70 percent over conventional Silicon (Si) based UPS. Offered in both 500kVA and 750kVA sizes, Mitsubishi Electric's SUMMIT Series® offers a small footprint, high efficiency, and requires less cooling, lowering the total cost of ownership.

Mitsubishi Electric UPS products deliver high reliability through robust proprietary technology designed to provide continuous power in the most demanding environments. Mitsubishi Electric's installed base of 9900 series uninterruptible power supplies have sustained load carrying capability greater than 99.9992 percent of their actual operational history.

Mitsubishi Electric leads the industry in design, manufacturing, and servicing reliable, environmentally friendly UPS systems to extend data center uptime, prevent costly data loss and protect against damaging power surges. More information on Mitsubishi Electric's world-class service and its award-winning UPS is available at <http://www.meppi.com/UPS> or by calling 800-887-7830.

About Mitsubishi Electric Power Products, Inc. UPS Division

Since 1964, Mitsubishi Electric has manufactured precision-engineered, high-quality uninterruptible power supplies to protect its customers' mission-critical equipment during times of power instability. Mitsubishi Electric leads the industry in design, manufacturing, and servicing, environmentally friendly UPS systems to extend uptime, prevent data loss and protect against power surges. Mitsubishi Electric Power Products' UPS division offers systems in both single- and multi-module configurations and a broad range of kVA capacities. Visit www.meppi.com for more information.

In addition to uninterruptible power supplies, [Mitsubishi Electric US group companies'](#) principal businesses include semiconductor devices, automotive electrical components, elevators and escalators, factory automation products and services, heating and cooling products, electric utility products, and large-scale video displays for stadiums and arenas. Mitsubishi Electric US group companies have roughly 31 locations throughout North America with approximately 4,000 employees.

SUMMIT Series is a registered trademark of Mitsubishi Electric Power Products, Inc.
